WavePath™ Navigation Technology

Leveraging cutting-edge technology, WavePath™ intelligently assesses the robot's position in the pool, selecting optimal cleaning paths to deliver a thorough and effective clean across all pool surfaces.

Periodic Cleaning

Your Aiper device will clean for 45 minutes every 48 hours before entering low power mode, keeping your pool clean throughout the week, so when the weekend arrives, your pool is swim-ready.

Replaceable MicroMesh™ Ultra-fine Filter Captures Fine Debris

This Replaceable MicroMesh™ Ultra-fine Filter ensures all impurities, including tiny sand and dust particles, are effectively captured in the dust chamber, preventing clogs and maintaining long-lasting cleaning efficiency.

Superior Obstacle Traversal for Edge-to-edge Cleaning

For edge-to-edge cleaning, the caterpillar treads of the Scuba N1 provide better traction, superior mobility, and superior obstacle traversal along your pool's floor and walls.

OTA Upgrades with the Aiper App

Continuous OTA updates improve path planning, provide the latest features, and maintain a pristine swimming environment.
